ABOUT ME

I am a versatile and results-driven web developer with a strong foundation in front-end and back-end technologies. I am proficient in creating and implementing innovative web solutions to meet project specifications and deadlines. Finely, I am adept at collaborating with cross-functional teams to drive project success.

EDUCATION

1337 - Khouribga
April 2019 - 2023

Completed intensive and immersive Full Stack Web Development training at 1337 School, renowned for its innovative and project-based curriculum. Acquired comprehensive proficiency in a wide range of technologies, including front-end (HTML5, CSS3, JavaScript, React.js), back-end (Node.js, Express.js), and databases (MongoDB, MySQL). Developed a strong foundation in software development methodologies, problem-solving, and collaborative teamwork. Graduated with a focus on practical skills, ready to contribute to dynamic and challenging web development projects.

ISGI - Khouribga
Sep 2017 - Aug 2019

Holder of an ISGI Technician diploma in computer development, I have undergone comprehensive training in programming languages, including Java, Python, and C++, coupled with in-depth studies in databases, web development, and systems analysis.

Bir Anzarane School - Fkih Ben Salah
2015 - 2016

Bachelor of Science in Physics and Chemistry

WORK EXPERIENCE

Full stock developper
Jan 2021 - Present

Gear9 l Casablanca

As a vital member of the dynamic web development team at Inwi.ma project, I played a crucial role in the conceptualization, design, and implementation of the company's official website. Our collaborative efforts resulted in the creation of a user-centric and technologically advanced online platform that serves as the primary gateway for Inwi.ma's telecommunications services.

Internship
April 2021- October 2021

Um6p l Benguerir

As a Software Engineer intern at Mohammed VI Polytechnic University, I had the exciting opportunity to contribute to the development of a dynamic website. Working closely with a talented team, I played a key role in designing and implementing new features, enhancing the site's functionality, and ensuring a seamless user experience.

PROJECTS

Inwi.ma

Build website to digitize company business

Red-tetris

The goal of this project is to develop a multiplayer tetris game on the network with a set of software exclusively from Full Stack Javascript.

Hypertube

Ceate a video streaming site downloaded via the BitTorrent protocol

Matcha

dating website,Interact between users
